Portfolio: nisadu-nimsitha.vercel.app

PROFESSIONAL SUMMARY

Computer Science (Honours) undergraduate pursuing DevOps, Cloud and Networking internships, with hands-on experience deploying a six-service Spring Boot marketplace using Docker Compose and AWS EC2. Configured Jenkins/Maven pipeline stages and Kubernetes manifests, and troubleshoot API Gateway, CORS, and JWT issues. Built a FastAPI monitoring service with Prometheus instrumentation and five passing pytest tests.

TECHNICAL SKILLS

DevOps & Cloud: Docker, Docker Compose, Kubernetes manifests, Jenkins, CI/CD, AWS EC2, Linux, Nginx, Maven

Programming & Backend: Python, Java, Spring Boot, FastAPI, SQL, PostgreSQL, REST APIs, pytest

Networking & Monitoring: TCP/IP fundamentals, Prometheus metrics, API Gateway, JWT, CORS, Cisco Packet Tracer

Developer Tools: Git, GitHub, Postman, YAML, JavaScript, React, Vite, Vercel

EDUCATION

Bachelor of Science (Honours) in Computer Science | University of Sri Jayewardenepura | Expected 2028

GPA (current): 3.31/4.00

Relevant coursework: Service-Oriented Computing, Data Structures & Algorithms, Computer Security, Machine Learning, Net-Centric Computing, Software Quality Assurance.

TECHNICAL PROJECT EXPERIENCE

Lanka MicroJob - Microservices & Cloud Deployment | University team project | 2026

Project link: github.com/nisa2003-ops/Lanka-Microjob-V1

- Co-developed six Java/Spring Boot services covering authentication, jobs, matching, brokers, notifications, and API routing, enabling separate workflows for key marketplace user roles.
- Containerized six backend services, a Vite frontend, and PostgreSQL in an eight-container Docker Compose stack, enabling coordinated application startup across components.
- Configured Jenkins/Maven build-and-deployment stages and Kubernetes manifests, providing deployment artifacts for a repeatable university demonstration workflow.
- Deployed the container stack on AWS EC2 (Amazon Linux 2023) and validated startup of the frontend, database, and microservices.
- Investigated CORS and JWT authentication issues through gateway configuration and endpoint testing; verified successful administrator login via the correct API endpoint.

NetworkOps - API Monitoring Foundation | Personal project (in progress) | 2026

- Developed a FastAPI service instrumented with Prometheus counters and latency histograms, exposing HTTP activity and response-time measurements through a metrics endpoint.
- Validated the initial API with five passing pytest tests, establishing an automated test baseline before Docker containerization.

Dengue Risk Classification - ML Training Workflow | University team project | 2026

Project link: github.com/nisa2003-ops/Dengue-Risk-MLOps-1

- Prepared chronologically separated training and validation datasets in a recorded pipeline run (13,150 training and 2,800 validation records), preserving time order for model evaluation.

- Compared three classifiers (Logistic Regression, Random Forest, and XGBoost) using shared evaluation criteria and saved reports to support reproducible model selection.
- Contributed to historical lag/rolling features and training-only risk thresholds, avoiding the use of future observations in risk classification evaluation.

Sathsara Dahana - Participant Results Website | Collaborative event website | 2026

Project link: sathsaradahana.live

- Implemented participant result lookup by index number and downloadable selection cards, allowing self-service access to selection outcomes.
- Added countdown and scheduled results-release messaging, aligning public announcements with the event release plan.

CERTIFICATIONS

- AWS Academy Graduate - Microservices and CI/CD Pipeline Builder | AWS Academy | Aug 2026
- AWS Academy Graduate - Cloud Security Builder | AWS Academy | Sep 2026
- AWS Academy Graduate - Cloud Security Foundations | AWS Academy | Jul 2026
- AWS Academy Graduate - Cloud Foundations | AWS Academy | May 2026
- Kubernetes Crash Course | KodeKloud | May 2026
- Linux for Absolute Beginners | KodeKloud | May 2026
- Getting Started with Cisco Packet Tracer | Cisco Networking Academy | Sep 2026
- FusionX 1.0 AI Bootcamp | University of Sri Jayewardenepura | Completion certificate

COURSES IN PROGRESS

- Networking Basics | Cisco Networking Academy | In progress
- Linux Essentials | Cisco Networking Academy | In progress

ADDITIONAL EXPERIENCE

- Published a personal developer portfolio linking project demonstrations, source repositories, and course credentials, giving recruiters a central place to review technical work.
