PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate at the University of Sri Jayewardenepura with hands-on experience building full stack web applications, Flutter mobile apps, and AI-powered tools. Proficient in React, Node.js, PHP, MySQL, and Flutter, with applied experience integrating large language model APIs (Gemini, Claude). Passionate about building locally relevant technology and continuously expanding skills across the software development stack.

EDUCATION

Bachelor of Science in Computer Science 2023 – Present

University of Sri Jayewardenepura, Nugegoda, Sri Lanka

- Relevant coursework: Database Management Systems, Data Structures, Software Engineering, Object Oriented Programming
- Academic project: Inventory Management System - full-stack PHP/MySQL with 3NF schema, role-based access control, and real-time stock tracking

G.C.E. Advanced Level (Physical Science Stream) 2022

Ananda College, Colombo 10, Sri Lanka

- Mathematics - C | Physics - C | Chemistry - B

Diploma in Information Technology (DITEC) Completed

ESOFT Metro Campus, Sri Lanka

- Covered core IT fundamentals including programming, networking, database concepts, and software development practices

TECHNICAL SKILLS

Languages: Java, Python, PHP, Dart, SQL, HTML5, CSS3

Frontend: React.js, Vite, CSS Modules, Tailwind CSS, Leaflet.js

Backend: Node.js, Express.js, PHP (Apache), REST APIs

Mobile: Flutter, Google ML Kit, Syncfusion, pdfx

Databases: MySQL, relational schema design, 3NF normalisation

AI / APIs: Gemini 2.5 Flash, Claude API, OpenWeatherMap API, Unsplash API

Tools & DevOps: Git, GitHub, Vercel, Render, npm, Nodemailer, VS Code

WORK EXPERIENCE

Customer Care Executive Nov 2023 – Apr 2024

Startek, Sri Lanka

- Handled inbound and outbound customer interactions, resolving queries and complaints efficiently while maintaining high satisfaction standards
- Developed strong communication, problem-solving, and multitasking skills in a fast-paced, team-oriented environment
- Gained experience with CRM tools and internal ticketing systems for issue tracking and escalation management

PROJECTS

Lanka Travel Planner April 2026

React · Vite · Gemini 2.5 Flash · Leaflet.js · OpenWeatherMap · Unsplash API

- Built a full featured AI travel planning web app for Sri Lanka, enabling users to generate personalized itineraries with budget filtering, hotel and food recommendations, and transport routes
- Integrated Gemini 2.5 Flash for dynamic itinerary generation and conversational chat with structured JSON prompt engineering for reliable output parsing
- Implemented Sinhala/English bilingual toggle with full itinerary regeneration on language switch; resolved caching bugs in state management
- Embedded interactive Leaflet.js maps, live weather via OpenWeatherMap, and destination photo galleries via Unsplash API

Personal Portfolio Website April 2026

React · Vite · CSS Modules · Node.js · Express · Nodemailer · Vercel · Render

- Designed and deployed a professional portfolio site featuring a Midnight Purple & Gold theme with Cormorant Garamond and DM Mono typography
- Built a Node/Express backend with Nodemailer for functional contact form email delivery; resolved CORS and deployment issues across Vercel (frontend) and Render (backend)
- Implemented component-based architecture with lazy loading, responsive design, and optimized asset delivery

AI Notes Summarizer - Flutter Mobile App January 2026

Flutter · Dart · Google ML Kit · Gemini 2.5 Flash · Syncfusion · pdfx

- Developed a cross-platform mobile app that performs OCR on camera/gallery images and PDF documents, then uses Gemini 2.5 Flash to produce paragraph summaries, bullet points, key topics, and quiz questions
- Implemented chunk-based summarisation to handle Gemini API rate limits; resolved ML Kit Isolate incompatibility and iterated through Gemini model deprecations
- Added PDF export of summaries using Syncfusion; optimised APK build size and resolved CamScanner watermark edge cases

Inventory Management System - Group Academic Project March 2026

PHP · MySQL · Apache · HTML · CSS · JavaScript

- Collaborated in a team to deliver a full-stack inventory system for CSC 209 2.0 with role-based access (Admin, Manager, Cashier), real-time stock updates, supplier management, and expiry tracking
- Designed a 3NF normalized relational database schema; contributed to both backend PHP logic and front-end UI

ADDITIONAL INFORMATION

Languages: English (Professional), Sinhala (Native)

Interests: AI/ML applications, locally relevant technology, open-source development, cricket analytics

Available for internships and part-time software development roles. Portfolio and project source code available at above links.
