Professional Summary

Computer Science undergraduate with hands-on experience in Java/Spring Boot microservices, React applications, DevOps pipelines, and end-to-end MLOps workflows. Built and contributed to projects using PostgreSQL, REST APIs, JWT authentication, Docker, Kubernetes, Jenkins, FastAPI, scikit-learn, XGBoost, and MLflow. Strong foundation in software engineering, problem solving, and collaborative development; seeking internship opportunities in software engineering, DevOps, or machine learning engineering.

Education

University of Sri Jayewardenepura 2023 – Present
Bachelor of Science (Honours) in Computer Science Sri Lanka
Relevant areas: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Computer Security, Service-Oriented Computing, Operations Research, Software Quality Assurance.

Technical Skills

Languages: Java, Python, JavaScript, PHP, SQL, Dart, C, C#, R, HTML/CSS
Backend & APIs: Spring Boot, Spring Cloud Gateway, REST APIs, Node.js, Express.js, FastAPI, JWT
Frontend & Mobile: React, Vite, Flutter, Tailwind CSS, Leaflet.js
ML & Data: scikit-learn, XGBoost, MLflow, pandas, NumPy, model evaluation, time-aware validation
DevOps & Cloud: Docker, Docker Compose, Kubernetes, Jenkins, GitHub Actions, SonarQube, Nginx, Linux
Databases & Tools: PostgreSQL, MySQL, Git, GitHub, Maven, Postman, JUnit, PyCharm, VS Code

Selected Projects

Lanka MicroJob - Microservices Job Marketplace 2026
Java 21, Spring Boot, React/Vite, PostgreSQL, Docker, Kubernetes, Jenkins, SonarQube

- Contributed to a service-oriented platform with six Java services covering users, jobs, matching, brokers, notifications, and API Gateway routing, with JWT-based role access.
- Worked with Docker/Compose, Kubernetes manifests, Jenkins CI/CD, Nginx-served frontend assets, PostgreSQL persistence, automated tests, and service-to-service REST communication.

Dengue Risk Classification MLOps 2026
Python, scikit-learn, XGBoost, MLflow, FastAPI, Docker, GitHub Actions

- Developing an end-to-end pipeline to classify next-week dengue outbreak risk in Sri Lankan reporting districts using historical dengue cases and weather observations.
- Uses chronological splits, training-only target thresholds, Logistic Regression/Random Forest/XGBoost comparison, MLflow experiment tracking, FastAPI inference, CI, containerization, and drift/performance monitoring.

Lanka Travel Planner - AI Travel Web Application 2026
React, Vite, Gemini 2.5 Flash, Leaflet.js, OpenWeatherMap API, Unsplash API

- Built an AI-powered Sri Lanka travel planner with personalized itineraries, interactive route maps, budget breakdowns, hotel/food recommendations, and conversational assistance.
- Implemented Sinhala/English support, live weather integration, map-based routes, and itinerary regeneration with structured AI prompts and client-side state management.

Experience

Startek Nov 2023 – Apr 2024
Customer Care Executive Sri Lanka

- Managed inbound and outbound customer interactions, resolving queries and complaints in a fast-paced service environment.
- Used CRM and ticketing workflows for issue tracking and escalation while strengthening communication, prioritization, and problem-solving skills.

Certifications

AWS Academy: Cloud Security Foundations (Jul 2026) [Credential] | Cloud Foundations (May 2026) [Credential]
AWS Academy: Microservices & CI/CD Pipeline Builder (Aug 2026) [Credential] | Cloud Security Builder (Sep 2026) [Credential]
Cisco Networking Academy: Getting Started with Cisco Packet Tracer (Sep 2026) [Credential]
KodeKloud: Kubernetes Crash Course (May 2026) [Credential] | Linux For Absolute Beginners (May 2026) [Credential]
